Career Objective

I am a Computer Science undergraduate specializing in Artificial Intelligence, with hands-on experience in web development and machine learning projects. I enjoy solving real-world problems through technology and am currently seeking an internship where I can contribute my skills in Ai Automation development and AI/ML while learning from industry professionals

Education

- Computer Science Engineering (AI & ML)
- Nutan College of Engineering and Research, Pune
- Pass out Year 2027
- CGPA: 7.5

Technical Skills

- **Programming:** C, Java, Python (applied in machine learning and data analytics tasks), HTML, CSS, JavaScript.
- **Frameworks/Libraries:** flask, NumPy, pandas.
- **CS Concepts:** Data Structures and Algorithms (in C), Object Oriented Programming (Java), DBMS, Machine Learning
- **Tools:** Git, VS Code, Jupyter Notebook

Soft skills

- Profound Communication
- Leadership skills
- Problem-solving
- **Languages:** English (Fluent)

Projects

- **AMC Service Website:**
  Built Responsive website for AMC Service Website HTML, CSS and JavaScript.
- **Logistics Exp System:** Worked on a real-world Logistics ERP system by integrating a Fast API backend with a modern frontend and incorporating AI-assisted data analysis to improve shipment insights, reporting, and operational decision support.
- **Industrial automation dashboard:**
  Created a realtime automation dashboard which shows the real time machine data and automate its processand an attractive UI using HTML, CSS and JavaScript, Flask Api.

Experience:

GruhSetu – Housing Society Management Website

- Designed and developed the complete official website for GruhSetu Housing Society Management Services
- Handled professional email communication and digital coordination
- Supported branding, online presence, and client-facing operations
- **Technologies:** HTML, CSS, JavaScript, Backend APIs

Logistics ERP System – Laxmi Logistics

- Developed a logistics ERP system to manage operations and workflow
- Project executed as a **contract worth ₹2,00,000**
- Worked on system logic, backend APIs, and deployment support
- **Technologies:** Python, Flask/Fast API, Database integration

Certifications

- L&T - Advance Concept of Machine Learning,

  - Mastering Cloud Computing and AWS,

  - SQL for Data Analyst.

- Generative Ai– September 2025
- Green Skills & Artificial Intelligence Workshop, Shell India and Edunet Foundation- Nov 2024
- Python programing – Jun 2025
- VOIS POWERBI Foundation – may 2025

Achievements & Extracurriculars

- **Sports Achievements:** Represented in Kabaddi, Cricket & Wrestling at intercollegiate and district level.
- **Leadership Positions:** Led teams in college tech fests and workshops.
- **Hackathons Workshops:** Participated in AI/ML workshop by Shell & Edunet Foundation, College Level Hackathons.
